

Ottawa, June 1st, 2013

Tim Granger,
President & Chief Executive Officer
Lone Pine Resources Inc.
1100, 640 – 5th Avenue SW
Calgary, Alberta T2P 3G4

The Council of Canadians, the Réseau québécois sur l'Intégration continentale (RQIC), Sierra Club US, FLOW (For Love of Water), Coalition Eau Secours! and Amies de la Terre de Québec launched a petition together on May 14, 2013 urging Lone Pine Resources Inc. to drop a \$250-million NAFTA lawsuit against Quebec's moratorium on shale gas extraction (fracking).

The attached letter has been signed by 1000 people and requests that Lone Pine respect Quebec's its sovereign right to set its own environmental and resource laws by dropping its challenge to the fracking moratorium.

June 1st, 2013

Tim Granger,
President & Chief Executive Officer
Lone Pine Resources Inc.
1100, 640 – 5th Avenue SW
Calgary, Alberta T2P 3G4

Dear Tim Granger,

We're writing to urge you to drop Lone Pine Resources' NAFTA challenge against Quebec's fracking moratorium. Communities are demanding bans on fracking because case studies have shown fracking to contaminate drinking water, and because fracking can result in permanent removal and loss of large quantities of water from a watershed that feeds creeks, streams, lakes and wetlands.

The injection of fracking wastewater into the ground has been linked to earthquakes. Despite industry and some governments promoting natural gas as a clean, green (remove small quotes) fuel, studies show that fracked natural gas may produce as much greenhouse gas emissions as coal.

Quebec's moratorium on fracking is not arbitrary or without public purpose, as Lone Pine states in its Notice of Intent to sue Canada for \$250 million. In fact it is necessary to protect water, a public resource, based on both short and long term impacts and effects to other uses of water, the ecosystem, conservation and the health, safety and general welfare of communities. Thus, the Quebec government responded to legitimate and wholly proper public concerns about fracking in the St. Lawrence Valley.

This is a precautionary measure to protect the environment and health of Quebec, its people and water, and to take legitimate action while impacts of fracking are studied further and it is demonstrated, if possible, that no such harm will or is likely to occur. Nor is Quebec alone in its concern – countries and communities around the world are speaking out against fracking, and a moratorium is a proper and responsible measure for the province to take.

All communities, including Quebec, have a right to decide whether or not they want fracking. Companies like yours must not be allowed to abuse investor rights in treaties like NAFTA. We urge you to respect Quebec's right and obligation under international trade law, including NAFTA, to protect its people and its sovereign right to set its own environmental and resource laws by dropping your NAFTA challenge to the fracking moratorium.

Thank you for your attention into this matter.

Sincerely,
